

Global Technology Systems Expands Sales Team with OEM Sales Manager

FRAMINGHAM, Mass., November 6., 2018 – [Global Technology Systems](#) (GTS) today announced [John DelGiodice](#) has joined the company as OEM Sales Manager. In this role, DelGiodice will spearhead the drive to increase GTS' OEM business and penetrate new markets and regions in the U.S.

“As GTS looks to capitalize on our unique design, engineering and manufacturing capabilities, John DelGiodice’s wealth of knowledge, skills and industry contacts in the OEM engineering market made him a perfect fit for this new and exciting role at GTS,” said Larry Murray, CEO, GTS.

DelGiodice has decades of sales experience in the OEM industry with a strong focus on custom battery packs and related products and services. His successful career includes working with companies such as JMAR Electronics, Advacom Electronics, Kent Electronics, Avnet Electronics, and EAC. For the past ten years, DelGiodice was the Director of Sales for Rose Electronics, selling custom battery packs to the industrial, communications, GPS satellite, instrumentation and medical markets.

For nearly 20 years, GTS has been [designing, engineering and certifying](#) high-quality batteries and chargers that give more power to the mobile devices modern organizations rely on every day for business-critical applications. GTS is also the only provider of on-site [managed services](#), such as the recently launched [Batteries-as-a-Service](#), to help solve the daily problems caused by unhealthy batteries.

About GTS

Global Technology Systems (GTS) is an innovator of mobile device batteries, chargers and power management solutions and services that lower cost of ownership and increase productivity. With outstanding performance and unmatched quality, the company’s batteries and power management solutions are trusted by leading retail organizations, logistics companies, government agencies, and public safety officials around the globe. GTS is headquartered in Framingham, Massachusetts and operates design, manufacturing, and distribution centers across the U.S., Asia, and Europe.
