

Delivering Superior Mobile Power

Global Technology Systems, Inc. (GTS) is the trusted mobile power expert. GTS provides the highest quality products and services to power the world's leading mobile devices used for critical communications and mobile computing applications.

GTS mobile power products are the result of innovative design, cutting-edge engineering and world class manufacturing. Our capability and standards are unwavering, so we're able to supply products that meet your most stringent performance requirements, even when used under the toughest conditions.

Unlike other battery suppliers, GTS maintains an impressive array of in-house design resources to ensure we consistently exceed your expectations.

GTS Engineering and Production:

- 31 Full-time R&D Engineers
- 30 QA Engineers/Technicians
- 15 Production Engineers/Technicians

GTS Manufacturing and Distribution:

- 11 Production lines
- Capacity: 2 million single cell battery packs/month
- 300 Full-time production-line workers
- Global manufacturing and distribution operations

In-depth Expertise

GTS engineers provide in-depth technical expertise and strong support to solve your most important mobile power challenges. Our engineers partner with you from concept to commercialization, and beyond, to enhance the performance of your mobile devices. With GTS, you'll benefit from:

- The most innovative mobile power products
- The highest engineering and production quality standards
- Efficient and flexible manufacturing to accommodate any size order
- Short lead times for fast delivery
- Full product line to power devices from all leading manufacturers

The result is batteries, chargers and accessories that deliver the performance you demand, perfectly customized for your specific application.

GTS designs and manufactures a full product line to power all your essential mobile devices.

GTS products are manufactured to the tightest tolerances, for unsurpassed quality.

Advanced Manufacturing Produces the Best in Mobile Power

GTS manages the entire design, development and manufacturing process to maintain the highest quality.

Highest Quality Best Materials

We use only the best battery cells and materials in our products. We have received quality approvals from the world's most reputable suppliers including Sony®, Sanyo®, Maxwell®, and Panasonic®.

ideas for life

Built to the Toughest Industry Standards

ISO Certified

Quality Management System—ISO 9000 and ISO/TS 16949 The design and assembly of rechargeable battery

IECQ Certificate of Hazardous Substance Management

Applicable to European Directive 2002/95/EC ("RoHS") Design and Manufacture—Rechargeable Battery Packs

100% Power Cell Testing

Incoming QC performs 100% power cell matching tests before manufacturing to ensure optimal battery pack performance and longevity. Individual cells are matched for voltage and impedance, a process known as "cell balancing". Very few manufacturers have the technical expertise to do this—but GTS does.

State-of-the-Art Mass Production

Our State-of-the-Art "clean" assembly lines utilize in-process QC at every station. Adherence to strict quality standards throughout the production process ensures that every product we ship meets the highest performance levels.

Advanced Manufacturing Processes

GTS employs the latest manufacturing processes—such as ultrasonic and resistance welding, dimensional/electrical analysis, and PCM testing—for unmatched performance, durability and product appearance. Here is one of our ultrasonic welding units, which provides welds of maximum strength and visual neatness and uniformity.

Final Assembly Quality Assurance

We use rigorous final assembly quality assurance testing (per AQL 0.25 standard) to ensure that the customer always receives superior merchandise.
